ORBIT

QMS maintenance
& evolution

Need a QMS that fits the way your team works?

Explore the QMS offer →

SIMPLE TODAY. READY FOR TOMORROW.

One strong core. The right level of support.

Start with the same 24 Core Sponsor SOPs, then choose how much help you need and add operational modules only where activities are performed in-house.

Your QMS should reflect how your organisation actually works —
not force you into an oversized CRO-style system.

Ready to choose the right level of support?

[Explore the QMS offer](#) →

Same QMS foundation. Different level of support.

Both offers are built around the same 24 Core Sponsor SOPs.
The difference is how far ExperTrials works alongside your team.

LAUNCHPAD

You lead. We guide.

24 Core Sponsor SOPs
A complete sponsor-side QMS foundation.

Tools & templates
Practical associated documents to put the SOPs into use.

Expert guidance
Structured support to help your team understand and deploy the framework.

Best fit: teams with internal capacity to own implementation.

CO-PILOT

We build it with you.

Same 24 Core Sponsor SOPs
No reduced or expanded core: the same robust foundation.

Customisation
Roles, workflows and associated documents adapted to your organisation.

Implementation & training
Hands-on rollout support so the QMS becomes part of daily operations.

Best fit: teams wanting hands-on design, rollout and adoption support.

Need guidance or hands-on implementation support?

Request QMS support →

SIMPLE TODAY. READY FOR TOMORROW.

Add only what you operate **in-house.**

Operational SOP modules can be added à la carte when your team performs activities directly rather than only overseeing a CRO or specialist vendor.

SPONSOR QMS | EXECUTION MODULES

Add operational depth only where needed

FOR WHAT'S NEXT

CLINICAL OPS

Site management, monitoring and centralised oversight

DATA MANAGEMENT

Database build, cleaning, reconciliation, lock and transfer

BIOSTATISTICS

SAP, statistical programming, analyses and QC

PV & MEDICAL

Safety processing, reporting, medical review and escalation

REGULATORY & TMF

Submission preparation, filing, QC and reconciliation

SYSTEMS / SUPPLY / LAB

System administration, IP supply and sample coordination

Core sponsor oversight remains in place.

Execution Modules add the procedures needed for direct internal execution.

Need operational depth in selected functions?

expertrials.com | +33 (0)4 20 91 00 60

Keep your QMS in step.

Clinical development changes. Your QMS should change with it — without rebuilding from scratch.

Periodic QMS review

Keep procedures current, coherent and usable.

Regulatory evolution

Assess relevant changes and update affected documents.

Organisational change

Adapt roles, governance and workflows as your team grows.

Vendor & model changes

Reflect new CROs, vendors, systems or delegated activities.

A living QMS: controlled, practical and aligned with the way your sponsor organisation evolves.

Want your QMS to evolve without starting over?

Explore QMS Orbit →

SIMPLE TODAY. READY FOR TOMORROW.

A QMS that fits today. And still fits tomorrow.

Start with a complete sponsor-side foundation.
Choose the support you need. Add operational
depth only where it belongs.
